Physiology Boiled Down.

NARCOTICS.

To narcotize is to deaden or benumb,
and thereby slow up the action of an
organ. Alcoholic preparations are by
courtesy called stimulants, but really
they are called irritants. Benumbing
preparations are, by courtesy called
anodynes and sedatives, but really
they are narcotics. All attacks on the
nervous system are made through the
circulation, and as action and reaction
are equal and opposite, so when
irritation ceases narcotism follows. It
comes from a Greek word meaning
poison in which arrows were dipped.
All narcotism means death, but some
agents act in one way, and some in
another, and some, acting in several
ways, are more speedy than others.

Among these last mentioned we may
enumerate all preparations of Gelsen-
ium, Opium, Aconite, Belladonna, and
Stramonium. These paralyze the or-
gans of circulation and nutrition. It
may bring some light to remark here
that bodily death is the art of nutri-
tion, and that when men die from
what are called natural causes, they
break off between
